

PROMINAR

PURE EXPERIENCE

Brand Vision

The name of PROMINAR is given to **Kowa's most advanced and highest quality optical products.**

For over 70 years, its reliable and reputable optical systems have served as the essential components in our mainstay products. By 1950s, the Golden Age of Cinema, more than 80% of Japan's movie theaters used 35mm projectors equipped with PROMINAR lenses.

Turning a new page for the highly admired brand at the dawn of the 21st century, we elevate PROMINAR with **Pure Fluorite Crystal** and its incomparable optical performance.

To maximize the benefits of this material, which requires the **Spirit of Takumi**, we channel expertise and finesse to craft PROMINAR products that clear rigorous inspections before heading out into the world.

We are applying superior optical design and sophisticated craftsmanship to open up a new world for PROMINAR.
